Full Report on Manufacturers' Shipments, Inventories and Orders May 2006

Summary

New orders for manufactured goods in May, up three of the last four months, increased \$2.6 billion or 0.7 percent to \$399.9 billion, the U.S. Census Bureau reported today. This followed a 2.0 percent April decrease.

Shipments, up two of the last three months, increased \$8.6 billion or 2.2 percent to \$403.1 billion. This was at the highest level since the series was first stated on a NAICS basis in 1992 and followed a 0.1 percent April decrease.

Unfilled orders, up twelve of the last thirteen months, increased \$3.7 billion or 0.6 percent to \$611.3 billion. This was at the highest level since the series began and followed a 1.5 percent April increase. The unfilled orders-to-shipments ratio was 4.20, down from 4.26 in April.

Inventories, down following two consecutive monthly increases, decreased slightly to \$462.3 billion. This followed a 1.0 percent April increase. The inventories-to-shipments ratio was 1.15, down from 1.17 in April.

New Orders

New orders for manufactured durable goods in May, down two consecutive months, decreased \$0.4 billion or 0.2 percent to \$208.8 billion, revised from the previously published 0.3 percent decrease. This followed a 4.7 percent April decrease.

Transportation equipment, down two consecutive months, had the largest decrease, \$1.6 billion or 2.6 percent to \$58.6 billion.

New orders for manufactured nondurable goods increased \$3.1 billion or 1.6 percent to \$191.1 billion.

Shipments

Shipments of manufactured durable goods in May, up three of the last four months, increased \$5.6 billion or 2.7 percent to \$212.1 billion, revised from the previously published 2.6 percent increase. This was at the highest level since the series began and followed a 1.2 percent April decrease.

Transportation equipment, up three of the last four months, had the largest increase, \$2.8 billion or 5.1 percent to \$57.5 billion.

Shipments of manufactured nondurable goods, up six of the last seven months, increased \$3.1 billion or 1.6 percent to \$191.1 billion. This was at the highest level since the series began. The increase was led by petroleum and coal products, which increased \$0.9 billion or 2.3 percent to \$39.1 billion.

Unfilled Orders

Unfilled orders for manufactured durable goods in May, up twelve of the last thirteen months, increased \$3.7 billion or 0.6 percent to \$611.3 billion, unchanged from the previously published increase. This was at the highest level since the series began and followed a 1.5 percent April increase.

Machinery, up twenty-one consecutive months, had the largest increase, \$1.4 billion or 2.1 percent to \$68.0 billion.

Inventories

Inventories of manufactured durable goods in May, up four of the last five months, increased \$1.2 billion or 0.4 percent to \$280.1 billion, unchanged from the previously published increase. This followed a 1.2 percent April increase.

Primary metals, up six consecutive months, had the largest increase, \$0.6 billion or 2.3 percent to \$27.1 billion.

Inventories of manufactured nondurable goods, down following two consecutive monthly increases, decreased \$1.2 billion or 0.7 percent to \$182.2 billion. The decrease was led by petroleum and coal products, which decreased \$1.0 billion or 3.5 percent to \$26.9 billion.

By stage of fabrication, May materials and supplies increased 0.5 percent in durable goods and decreased 0.4 percent in nondurable goods. Work in process increased 0.5 percent in durable goods and decreased 2.7 percent in nondurable goods. Finished goods increased 0.3 percent in durable goods and decreased 0.2 percent in nondurable goods.

Figures in text, other than year-to-date, are in seasonally adjusted current dollars. Figures on new and unfilled orders exclude data for semiconductor manufacturing. For data, call (301) 763-4673 or go to <<http://www.census.gov/m3>>.

The advance report on durable goods for June is scheduled for release on July 27, 2006, at 8:30 a.m. EDT and the full report on August 3, 2006, at 10:00 a.m. EDT. See back page for survey description.

¹ New orders are the totals for the period and are adjusted for trading-day and calendar-month variations.² Data on new orders are not available for the semiconductor industry. Estimates and percent changes for new orders exclude semiconductor industry data.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. Further details on survey design, methodology, and data limitations are contained in our most recent annual benchmark publication, Current Industrial Reports: M3-3(05), "Manufacturers' Shipments, Inventories, and Orders: 1992-2005."

^p Preliminary ^r Revised X Not Applicable.

¹ Topical series are regroupings of the separate industry categories.

² Shipments and new orders are the totals for the period and are adjusted for trading-day and calendar-month variations.

³ Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers; computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment; appliances, and components; heavy duty trucks; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.

⁴ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment.

⁵ Estimates and percent changes exclude semiconductor industry data.

⁶ Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.

See note at end of Table 2 relating to survey error and revision.

¹ The current month revisions are the difference between the advance percent change and the percent change as shown in this publication.

² The twelve month revisions are the differences between the month-to-month percent changes of the preliminary and final estimates. The monthly averages are the simple averages of the absolute values of the differences for the months specified. The advance to final percent change revisions for the durable goods industries are shown in the advance report for the month.

Survey Description

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey. This survey provides statistics on manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-in-process, and finished goods). The M3 includes approximately 4,200 reporting units. Units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 89 industry categories. Due to the small monthly sample, these 89 categories have been combined into 59 publication levels. The survey methodology assumes that the month-to-month changes of the total operations of those companies in the monthly survey effectively represent the month-to-month movements of all establishments that make up the category. The current coverage levels in the survey show that reported data in the monthly survey represent approximately 62 percent of the shipments estimates at the total manufacturing level. Data published represent manufacturing in a calendar month. The data collection is based on a voluntary survey authorized by Title 13 of the United States Code.

The data presented in this release are based on data obtained from a panel of 4,200 reporting units and provide an indication of the activity within the manufacturing sector. The results differ from what would be obtained from a complete enumeration of all manufacturing companies. In addition, a different panel of 4,200 companies would yield different results. The M3 panel is comprised of companies with \$500 million or more in shipments and a limited number of smaller companies. From a statistical perspective, the panel is not a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections in the data will be released in the next month's advance report. Any revisions made later than two months will be reflected in the annual benchmark publication.

Additional survey documentation can be found on our web site: <http://www.census.gov/m3>.
